

Questions

Answers to these questions can be found in Appendix G. Note that throughout this book, multiple-choice questions can have more than one correct answer.

1) Pascal, BASIC, and C are ~~procedural~~ procedural languages, while C++ is an object oriented language.

- 2) A widget is to the blueprint for a widget as an object is to
- a. a member function
 - b. a class
 - c. an operator.
 - d. data item.

→ Ans: b. a class

3) The two major components of an object are data and functions that ~~data~~ act on that data.

- 4) In C++, a function contained within a class is called.
- a. a member function
 - b. an operator
 - c. a class function
 - d. a method

→ Ans: d. a method

5) Protecting data from access by unauthorized functions is called encapsulation.

6) Which of the following are good reasons to use an object oriented language?

- a. You can define your own data types.
- b. Program statements are simpler than in procedural language.
- c. An OOP program can be taught to correct its own errors.
- d. It's easier to conceptualize an OO program.

Ans: d. It's easier to conceptualize an OO program.

7) Objects model entities in the real world more closely than do functions.

8) True or False: A C++ program is similar to a C program except for the details of coding.

- Ans: False

9) Bundling data and functions together is called encapsulation.

10) When a language has the capability to produce new data types, it is said to be

- a. reprehensible
- b. encapsulated
- c. overloaded
- d. extensible

→ Ans: ~~b. encapsulated~~ d. extensible

11) True or False: You can easily tell, from any two lines of code, whether a program is written in C or C++.

- Ans: False

12) The ability of a function or operator to act in different ways on different data types is called polymorphism.

13) A normal C++ operator that acts in special ways on newly defined data type is said to be

- a. glorified
- b. encapsulated
- c. classified
- d. overloaded

→ Ans: d. overloaded

14) Memorizing the new terms used in C++ is

- a. Critically important
- b. something you can return to later
- c. the key to wealth and success.
- d. completely irrelevant.

→ Ans: b. something you can return to later.

15) The Unified Modeling Language is

- a. a program that builds physical models.
- b. a way to look at the organization of a program.
- c. the combination of C++ and FORTRAN
- d. helpful in developing software systems.

Ans: b. a way to look at the organization of a program.
