

As a part of the **C++ Programming course**, each group is required to deliver a presentation on the assigned topic. The presentation should include:

- Well-prepared **PowerPoint slides**
- **Sample C++ code** demonstrating the concept
- Corresponding **output** with explanation

Group Members and Assigned Topics

Group 1

Topic: *Method Overloading and Method Overriding in C++*

Members:

- Anuj Adhikari
- Dil Bahadur Ale Magar

Group 2

Topic: *Compile-time Polymorphism and Runtime Polymorphism in C++*

Members:

- Archana Rijal
- Nishant Bhattarai

Group 3

Topic: *Constructor Types in C++*

Members:

- Pradeep Risel
- Pratik Acharya

Group 4

Topic: *Friend Function in C++*

Members:

- Jyoti Dangal
- Salina Shrestha

Group 5

Topic: *Encapsulation in C++*

Members:

- Pratikalpa Rai
- Rasila Moktan

Group 6

Topic: *Inheritance and Types of Inheritance in C++*

Members:

- Saugat Niraula
- Saurabh Basel

Group 7

Topic: *Virtual Functions and Pure Virtual Functions in C++*

Members:

- Sisan Regmi
- Sharda Mani Neupane

Group 8

Topic: *Abstract Class in C++*

Members:

- Sohan Pratibha Humagain
- Rahul Kumar Chaudhary

Presentation Schedule

Dates: *July 17, 2025 and July 18, 2025*

Note:

This group presentation is an integral part of your course and carries **5 marks** toward your internal evaluation. **Students who fail to attend and present will not be eligible to receive these marks.**
